# Guntner UK

## Quality products and excellent customer service

Guntner UK was established in 1989 to promote and support sales of Guntner group products in the UK and Ireland. Since then the company has built up a strong reputation in the building services and refrigeration markets for quality products and excellent customer service.

As part of a major international heat exchanger group, Guntner UK has expanded the local operation to service a wider range of markets to promote the full capability of Guntner and thermowave products.

Our dedicated team of experienced engineers is here to help with your enquiries and technical support requirements. We can advise you on the optimal design and installation layout to offer the best technical and commercial solution to meet your needs in a competitive market.

Our contracts and logistics team will see your individual project through from concept to completion, ensuring all equipment is delivered on time and to meet your needs. Ongoing customer support is assured with our genuine spare parts service and operation and maintenance advice.

Manufacturing since the early 1930s and now based near Munich, Guntner use state of the art facilities. Production capacity was extended in the 1990s to sites throughout Europe, Russia, Mexico and Indonesia to meet the demands of an ever-expanding market.

More recently in 2009, dedicated production lines have been put in place to manufacture Guntner microox® technology products. This brings the total production area across the nine manufacturing sites to 130.000m<sup>2</sup> with 3,000 employees worldwide.

thermowave has been specialising in the development, design, manufacture, and distribution of quality plate heat exchangers since 1992. Manufactured on our automated pressing line in Berga, Germany, thermowave products are recognised globally under the thermoline® brand.

International approvals and certification including ISO 9001/2008, PED 97/23 EC are standard, but the company also holds ASME U and UM stamp to offer a truly worldwide capability across all industries.

*Covering a wide range of applications...*

energy and power

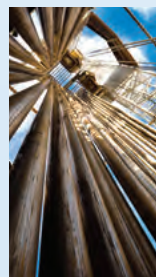

refrigeration

building services

chemical and process

oil and gas

pharmaceutical

food and beverage

## Dry Air Coolers and Condensers

### Certified performance

Guaranteed performance under the Eurovent testing programme.

### Floating coil design

Guntner's tried and tested floating coil design eliminating stress on the coil tubes.

Flat Bed Dry Air Cooler/Condenser

microox® Condenser (microchannel)

### Adiabatic systems

For high ambient temperature applications suitable for all finoox® designs.

### Accessories

Wide range of accessories including fan isolators, inspection hatches, hinged fan plates and special coatings.

### Axial fans

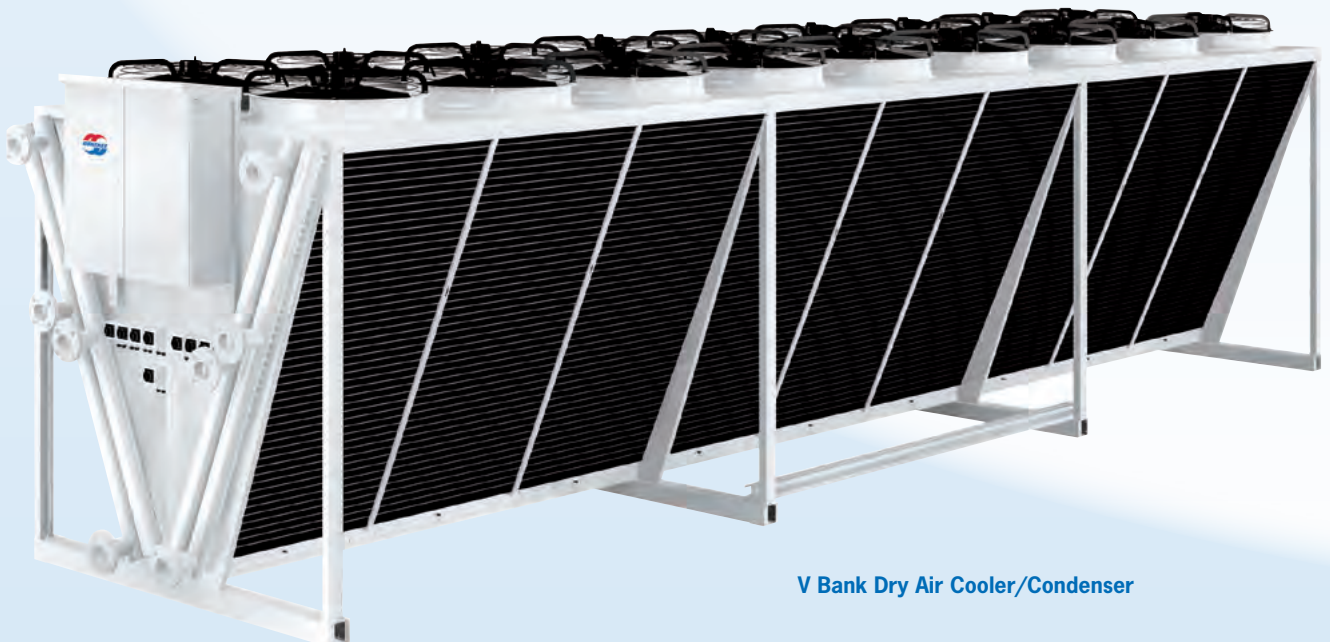

Various energy efficient fan designs in both AC and EC technology

### Control panels

Available with fan cycling, variable speed and sine wave controllers.

### microox® condensers

Light-weight aluminium construction. Various configurations including floor or wall mounting. Reduced refrigeration charge.

V Bank Dry Air Cooler/Condenser

## Plate Heat Exchangers

### Heat recovery and free cooling

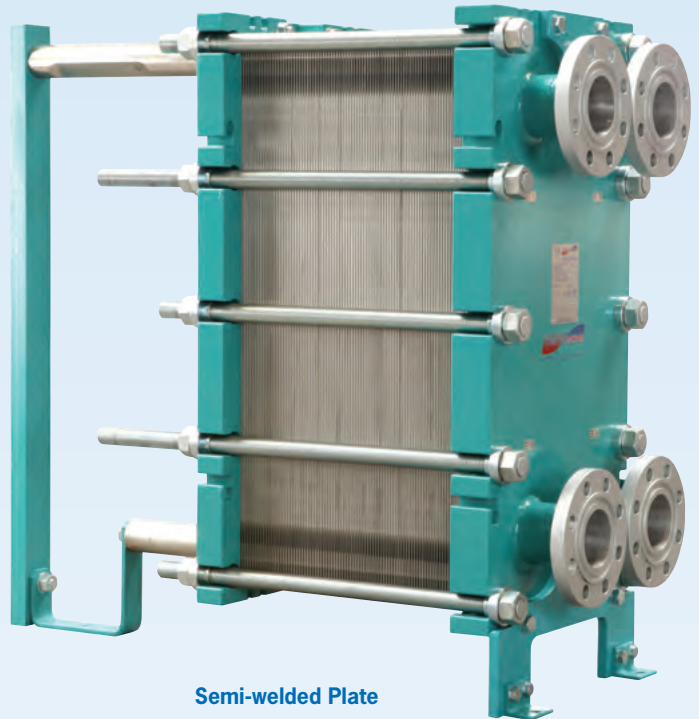

Cut energy bills across existing processes.

### System separation/pressure break

Protect high cost plant and equipment whilst reducing water treatment and dosing costs.

Gasketed Plate

Semi-welded Plate

### High efficiency

State-of-the-art technology delivers high value to price ratio.

### Product security

Safe processing and efficient control of valuable products.

### Mechanical design

Standard design to PED 97/23/EC and ASME VIII Div 1, U Stamp.

### Quality engineering

ISO 9001:2000 Quality Assurance and reliable performance. CE type approval.

### Compact and competitive

Space saving and competitive designs make thermowave PHEs the best choice solution.

### Spare parts and accessories

Guntner UK offer a full range of genuine spare parts and quality matched accessories.

Hygienic and Multi-section Frames

## Air Coolers

### Certified performance

Guaranteed performance under the Eurovent testing programme.

### Hygienic design

TÜV HACCP Approved

### Floating coil

Güntner tried and tested floating coil design eliminating stress on refrigerant carry tubes in operation.

Work Room Cooler

### Work room options

Low height units for working areas.

### Improved air throw

Inclined fan plate utilizes the coander effect. Güntner Streamers available to maximize air throw.

### Quick draining

Large drip tray drains at 45 degrees to clear condensate/defrost water efficiently.

### Simple installation and maintenance

Hinged ends and drop down trays as standard on most standard models.

Unit Cooler

### Bespoke design

Optimised configurations for commercial, industrial and OEM requirements.

### All refrigerants

Products available for all refrigerants including ammonia and CO<sub>2</sub>.

### High quality

Industrial material gauges ensure an enhanced service life.

### Efficient operation

EC fans as standard on smaller unit coolers. High efficiency brand name fans on all units.

Blast Freezer
